Press Release

COVID-X at the 4YFN & Mobile World Congress

The COVID-X programme, supported by the European Commission under Horizon2020 Programme, is very happy to announce its presence at the **4yfn & the Mobile World Congress** (28.01-03.03).

COVID-X funds **EU tech Companies** and **Healthcare Providers** to boost data-driven solutions with the power to overcome challenges in Diagnosis, Prognosis, and Follow-up and fight against the pandemic. **In addition to the direct funding, COVID-X provides top-ranked solutions access to a tailored 10 month long acceleration programme.**

Two Open Calls already took place with a final result of 15 solutions funded for OC1 and 14 selected solutions for funding within OC2.

Four OC1 COVID-X Game Changers will be in Barcelona. Healthcare providers interested in their solutions and their outcomes can find them at the event (see the booth numbers in the links on the names):

Covid@Home (Be Well innovations): A tool for home care monitoring leading to a better understanding of distributing the burden between hospital care and home care.

Healthentia - Care4Covid (Innovation SPRINT): Healthentia Care4COVID helps healthcare providers to improve their COVID-19 resilience by managing COVID-19 related symptoms of patients and health workers from remote and providing targeted support and care guidelines to them.

Segtnan (Synaptic): Innovative AI software enabling individualised group testing at any laboratory.

DDRehab (Ab.Acus): A remote physical and cognitive rehabilitation system of long-lasting coronavirus patients through smartphone use and merging different clinical data sets to set up personalised rehabilitation plans.

Some organisations will attend the event from the consortium side: F6S, SERMAS,Bosonit, Civitta & AUSTRALO, netcompany-intrasoft, UPM and Eight Bells, will have a booth with information about the final release of the sandbox.

If you are a healthcare provider willing to meet the solutions, please contact Blanca Arregui (blanca@australo.org) to organise a meeting with them.

COVID-X involves a consortium of 10 prominent partners from 7 different countries:
