Govt channelling **RM5.08b** to micro **SMEs under GKP**, payment of **RM1.5b** starts on June 10

According to Finance Minister Tengku Datuk Seri Zafrul Abdul Aziz, a total of RM5.08 billion has been allocated and will be channelled to nearly one million micro small and medium enterprises (micro SMEs) under the Geran Khas Prihatin (GKP) to tide over their difficulties since Covid-19 hit the country. The government hopes the direct assistance channelled to the micro SMEs will ease their burden, especially those affected by the implementation of the Movement Control Order (MCO) 3.0. Under PEMERKASA, announced on March 17, 2021, the government decided to provide GKP 3.0 of RM1,000 to more than one million micro traders to ensure the continuity of their business, especially in managing their cash flow. The government gave a similar commitment under PEMERKASA Plus, which was unveiled on May 31, 2021, where an additional amount of RM500 would be disbursed, increasing the total payment to RM1,500 for each micro SME to help them navigate through MCO 3.0. This means the total payment of GKP 3.0 is RM1.5 billion. He was pleased to inform that nearly one million micro SMEs involving existing recipients of MCO 1.0 and MCO 2.0, as well as micro SMEs that have been approved under MCO 3.0, will receive a payment of RM1,000 from June 10 (Thursday) in stages involving financial implications of almost RM1.0 billion. The payment will be credited directly to the bank account registered in the GKP system and the approval status can be checked from June 8, 2021 at the following link <https://gkp.hasil.gov.my>. An additional payment of RM500, involving an allocation of almost RM500 million, will be paid in July 2021 bringing the total amount under GKP 3.0 to RM1.5 billion.

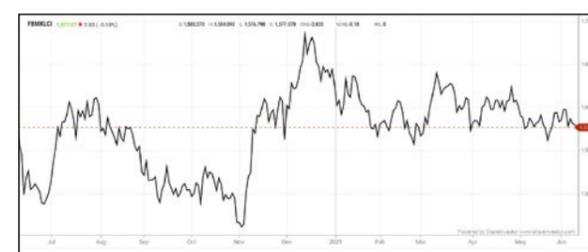

Bursa Malaysia warns of investment scams impersonating legitimate institutions

According to Bursa Malaysia Bhd, investors are advised to be on high alert to protect themselves and others from becoming victims of investment fraud. It has recently observed an increase in the number of scams involving the misuse of the Bursa Malaysia name and corporate logo. In times of uncertainty, such as the current COVID-19 pandemic, scammers try to lure victims into participating in dubious investment schemes and activities. They often use unlicensed or unregistered companies, websites and promotional material that mimic legitimate financial institutions to deceive the investing public. Investment scams typically

carry the Bursa Malaysia name and logo on marketing-related materials and social media postings, offering high investment returns with a guarantee of little or no risk. Investors are directed to 'spoo' websites and phone numbers set up by scammers, these fake websites look nearly identical to the actual sites of legitimate financial institutions. Calls to the phone numbers provided reach the scammer who pretends to be an employee who will then direct investors to transfer funds to an account with a different name. Hence, it reminded the public to invest only with licensed parties. An updated investor alert list of unauthorised websites, investment products, companies and individuals, is available at Bursa Academy at <https://www.bursaacademy.bursamarketplace.com/en/sc-investor-alert>. Additionally, investors should verify the information and not rely on unsolicited marketing materials. Investors should also compare and confirm websites or social media pages. Fake websites or social media pages will often have odd-looking (or low resolution) logos that do not match the legitimate company's logo. Investors should also avoid unusual payment methods and seek independent, professional advice. Be suspicious of unsolicited investment offers made online, on social media or over the phone. Bursa Malaysia said it does not engage third-party agents to represent it. If you receive unsolicited and or suspicious communications relating to or claiming to be agents of Bursa Malaysia, we recommend contacting us directly at 03-2732 0067 or via e-mail at bursa2u@bursamalaysia.com to authenticate the content of any such communication.

Technical Analysis

Source: ShareInvestor C² Chart

Based on the weekly chart for HRnetGroup, its share price has been trading along the 20 Day Moving average since June 2020. In September 2020, its share price suffered a steep drop with high volume, which resulted in breaching the lower limit of the Bollinger band. In the subsequent weeks, its share price remained near the lower limit of the band.

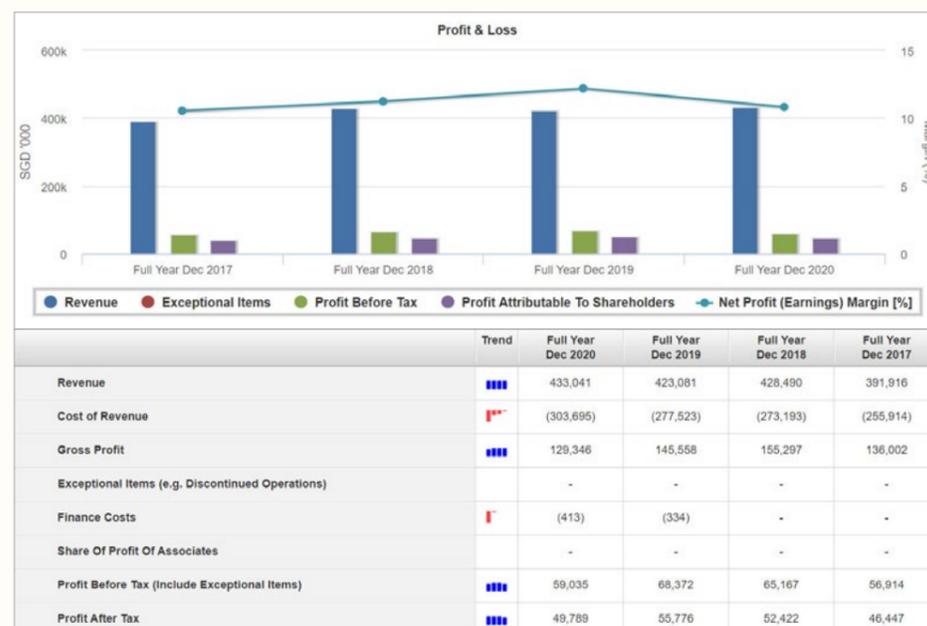

However, a series of bullish weekly candle has displayed between October and December 2020. This can be confirmed from the Moving average convergence divergence (MACD) histogram, which has turned green during the period and the MACD line has crossed the signal line. This shows that its share price has turned into an uptrend.

The uptrend continued until the end of March 2021, where its share price has traded beyond the upper limit of Bollinger band, MACD histogram turning red and the crossover in MACD line, which indicates some form of profit taking.

Since then, its share price is trading sideways, and the movement is within the area of 20 Day moving average and upper Bollinger band. With the latest weekly bullish candlestick, this resulted its Relative Strength Index ("RSI") to hit a high of 72, which is in the overbought region.

Lastly, as its share price still trades above the 20 Day Moving Average, it shows that the uptrend in share price is still intact. The next resistance will be around S\$0.71, which is the upper limit of the Bollinger band. On the other hand, investors will have to take note if its share price breached the 20 Day moving average, which is around S\$0.625. This could indicate a possible downtrend.

Financial Performance

Source: ShareInvestor WebPro

For FY2020, HRnetGroup's revenue (blue bar) grew by 2.35% year-on-year to S\$433.04 million. The higher revenue was attributed to the higher contribution from its flexible staffing segment, while being partially offset by its professional recruitment segment.

Despite the higher topline, HRnetGroup's profit after tax (purple bar) declined 10.73% year-on-year to S\$49.79 million. This was mainly due to the higher revenue weightage from its flexible staffing segment, which traditionally has a lower margin as compared to its professional recruitment segment.

It's All Transitory

Markets

According to the US Treasury Secretary and former Fed Chair, Jenet Yellen, while inflationary pressure is likely to persist and continue on a y-o-y basis, it is not permanent. She also commented that the US should push for the US\$4 trillion spending plan, a move that will see not only higher inflation into next year but also higher interest rates. At the same G7 summit, finance ministers entered into a landmark decision that will pave the way for the imposition of a minimum global corporate tax of at least 15%.

Locally, EPF announced a stellar 1Q 2021 performance with gross investment income rising by 59% y-o-y to RM19.29bil, with 74% of the income derived from its equity exposure. Interestingly, EPF also revealed that it had to-date approved RM57.97bil in i-Sinar withdrawals for 6.49mil members, while under the i-Lestari facility, RM20.8bil has been paid out to 5.27mil members.

Economy

The May 2021 Institute for Supply Management (ISM) for the Non-Manufacturing sector rose to 64.0 from 62.7 in the preceding month. Investors' focus this week was obviously on inflation readings, both from the US and China. US Consumer Price Index (CPI) for May came in at its fastest pace in 13 years with a jump of 5% y-o-y, ahead of market expectations of a 4.7% rise, while the core inflation rate jumped 3.8% y-o-y against a forecast of 3.5% increase.

Meanwhile, China's May 2021 CPI increased by 1.3% y-o-y but the Producer Price Index (PPI) surged 9% y-o-y, a fresh 13-year high. On external trade, Chinese exports for May 2021 came in 27.9% higher y-o-y but imports surged 51.1%, which was the highest in more than 10 years. China's trade balance with

the US remains in its favour as the May trade surplus came in at US\$31.8bil, up 13.1% from April's surplus of US\$28.1bil.

Locally, Bank Negara revealed that Malaysia's total international reserves as at 31-May stood at US\$110.9bil, US\$0.3bil higher compared with US\$110.6bil as at May 12.

Malaysia also reported approved investments data this week which showed foreign direct investments (FDIs) for the 1Q of 2021 leapfrogging to RM54.9bil from RM11.4bil a year ago, a jump of 383% y-o-y. In related news, Austria's AT&S, a printed circuit board and integrated circuit substrates manufacturer, unveiled its plan to have its Southeast Asia production hub in Malaysia and with a proposed investment of €1.7bil or RM8.5bil.

In other news, Malaysia's unemployment rate for April 2021 improved by 0.1 percentage points to 4.6% while Malaysia's May palm oil stock level rose 1.5% to reach 1.57mil tonnes as crude palm oil production increased 2.8% but exports fell by 6%.

Corporate

The FBM KLCI 30-stock index will see one change that will take effect from Monday, June 21, 2021, with Mr. D.I.Y. Group (M) replacing Supermax. Meanwhile, Jardine Cycle & Carriage Limited only managed to secure 88.04% of Cycle & Carriage Bintang at the close of the offer period to take the latter private at RM2.40 per share. In other M&A activities, Kuala Lumpur Kepong (KLK) announced a deal to buy a 56.2% stake in IJM Plantations (IJMP) from its parent company, IJM Corporation at RM3.10 per share, valuing the deal at RM1.534bil. KLK will also extend a mandatory general offer to acquire all the remaining IJMP shares not already held by KLK and persons

acting in concert upon the execution of the Sale and Purchase Agreement, and the same becoming unconditional, at a cash offer price of RM3.10 per IJMP share. Top Glove meanwhile reported its 3Q FY2021 report card that missed market expectations with both revenue and net earnings falling by 22.4% and 29% to RM4.16bil and RM2.03bil respectively as the effect of lower average selling prices kicks in.

Equity

Global equity markets closed mixed to firmer the past week with markets that trended higher experiencing gains of between 0.1% and 1.2% while markets that fell eased between 0.1% and 0.8%. The KLCI closed the four-day trading period 0.7% lower at 1,579.90 pts. For the week, net foreign outflow amounted to RM295mil as retailers and local institutions maintained their respective net buying interest at RM271.1mil and RM23.9mil.

Eye On Week Ahead

A slew of economic data points out of the US are due next week. On Tuesday, the monthly retail sales will be out with consensus looking at a flat m-o-m growth of zero percent. On the same day, the IPI and PPI too are expected to be released while housing starts and building permits are due on Wednesday, as the market is looking at 1.57mil and 1.73mil annualized rate respectively. The most anticipated event next week is the 2-day Federal Open Market Committee (FOMC) meeting on Tuesday and Wednesday. The market anticipates no change to the US Fed Fund Rate but the Fed's assessment of the factors that determine its rate moves and its tapering plans, if any, will be closely monitored.

Building a trading strategy is easier with the right help.

Many of us at one time or another have heard the convincing whispers of, “*Certain counters are going to move very soon. You can bet your bottom dollar on it.*” and when one is overcome by the lure of making money, it is very easy to put hard-earned money into a trade.

If the trade works out, well and good; but if it doesn’t, there’s no one to blame but one’s personal greed and impatience to get rich quick. Many have fallen by the wayside on the road to riches.

General statistics picked up from the internet indicate that 90% of retail investors are prone to losing money while trading. Given that there is another 10% that are possibly reaping profits, it may be a good idea to take a look at the profile of a prudent investor.

The general rule of thumb to begin investing prudently is most certainly to educate oneself in investment matters. For most investors who have not had the luxury of attending proper courses on investment and such, there is great temptation to just listen to self-professed financial gurus that offer bucket loads of investment advice which unfortunately tend to pull wool over sheep’s eyes. The lure of easy money is what separates a fool and his riches. And at the rate these financial gurus are mushrooming overnight leading innocent investor sheep to the slaughter, it is no wonder that regulators are coming down hard on them.

For those with no access to proper investment advice or guidance, all is not lost. Investing in the capital markets is an intensely regulated activity in Malaysia, meaning to say that investors’ best interests are looked after by regulators. There are proper channels offered by licensed brokers to guide those that are just starting out, and even for those who are jaded.

Take for instance, RHB Investment Bank. Alarmed at the proliferation of non-licensed financial gurus, RHB has taken steps in educating its customers to give them a safe environment in which to invest their hard earned money starting with their

closed group on Facebook – **RHB Morning Cuppa@8** – that sees licensed Research Analysts give stock market updates on every business day. On top of that, RHB regularly organizes complimentary coaching sessions and seminars listed on <https://www.rhbtradesmart.com/events.html> for those who are keen to formulate their own trading strategy, and more recently started a Telegram account for RHB Retail Equities Malaysia – a direct communication channel open to the public.

These initiatives are like rays of sunshine that cut through the mists of deception.

Boardroom dispute not an excuse for late submission of financial statements

Asia Media Group Berhad has learned the hard way that its dilly-dallying in the submission of its annual report and quarterly financial statements can land its directors in hot water. Every listed issuer must pay heed that the deadline for submission of annual report and quarterly financial statements must be strictly adhered to. The market regulators hardly accept excuses; internal conflicts/ disputes and board tussles are definitely not acceptable. The former board of Asia Media claimed that boardroom dispute and constant disagreements among the board members had led to the late submission of its annual report and financial statements. It had also hindered directors' ability to carry out their duties to ensure timely issuance of the AR2018. Such contravention is a serious offence as timely submission of financial statements is one of the fundamental obligations of listed companies and is of paramount importance to aid informed investment decisions. This public reprimand meted on Asia Media by Bursa Malaysia Securities Bhd will serve as a good lesson for local PLCs.

What went wrong?

On 1 June, the broadcasting, advertising and digital media company was publicly reprimanded by Bursa Malaysia Securities for breaches of:

- Paragraph 9.23(1) of the Main Market Listing Requirements (Main LR) for failing to issue the annual report that included the annual audited financial statements together with the auditors' and directors' reports for the financial year ended 31 December 2018 (AR2018) on or before 30 April 2019; and

- Paragraph 9.22(1) of the Main LR for failing to announce the quarterly report for the financial period ended 30 June 2019 (Q2FY2019) on or before 31 August 2019.

Asia Media had only issued/announced the AR2018 and Q2FY2019 on 25 October 2019 after a delay of almost six months and two months respectively. Towards this end, four former Asia Media directors namely Wong Shee Kai (executive director & CEO), Ong Kar Kian (executive director), Paul Jong Jun Hian (independent non-executive director, INED/audit committee chairman), Ong Chooi Lee (INED/audit committee member) were publicly reprimanded and fined for breach of paragraph 16.13(b) of the Main LR for permitting knowingly or where they had reasonable means of obtaining such knowledge for Asia Media to commit the breach of paragraph 9.23(1) of the Main LR.

Asia Media's failure to issue the AR2018 on time was due to the failure:

- To furnish the relevant information and documents to the external auditors, particularly the management accounts on time
- To address and resolve the key audit issue on impairment loss of the broadcast infrastructure and broadcasting licenses of RM12.9 million which represented 59.7% of the company's net assets as of 31 December 2018. This issue was specifically highlighted by the external auditors as the main key audit matter in the audit planning memorandum and the auditors' report of the audited financial statements for FY2016 and FY2017.

The four former directors had failed to discharge their duties to ensure timely issuance of AR2018 and the financial statements. They also failed to address and resolve the key audit issue despite the materiality of the issue. The directors had represented that there was a boardroom dispute and that the constant disagreements among the board members had led to the delay or affected the ability of the directors to carry out their duties to ensure the timely issuance of the AR 2018. However, Bursa Malaysia Securities stated that the boardroom dispute was a distinct and irrelevant issue towards the audit for FYE 31 December 2018. Consequently, the failure to issue the AR 2018 had also led to the delay in issuance of the 2nd quarter financial information for FY2019. Both the AR 2018 and the 2nd Quarter financial information for FY2019 were only issued on 25 October 2019, after the removal of the four former directors and appointment of new directors via an EGM held on 29 July 2019.

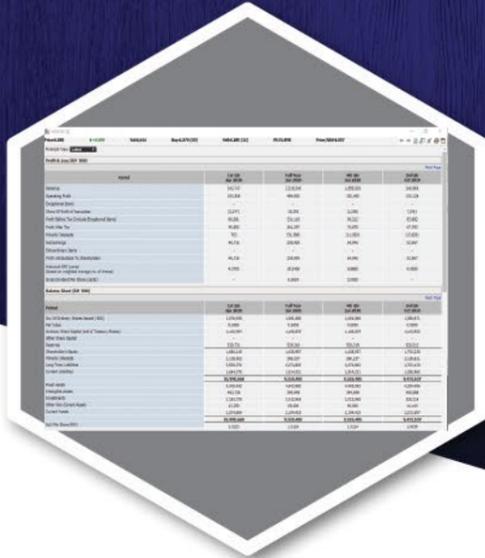

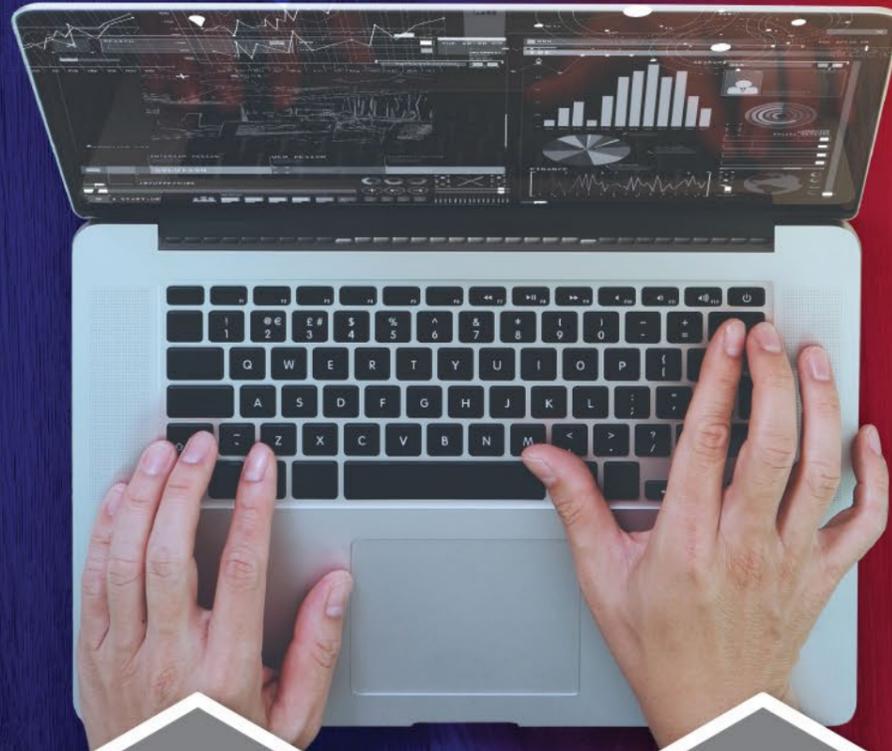

Boardroom tussles tend to distract directors from their obligations to disseminate timely reliable financial information; but this should never be accepted as a valid excuse. Directors should be aware that, precisely in such times, they must remind themselves of the need to disclose timely reliable financial information. The longer the delay the less useful the information becomes as the information becomes more historic and outdated. Timely financial information enables timely informed decision making by minority shareholders.
