EDITOR-IN-CHIEF

Hey everyone! My name is Alexis and I am the Editor-in-Chief for SimsVIP.com! I am a long-time simmer and community member, and am one of the writers for The Sims 4 Island Living Guide.

If you're reading my author bio, that means you're checking out the PDF version of our guide! I hope this guide helps you with enjoying beach life in Sulani and thank you for your continued support!

AUTHORS

SIMSERASERA

When not playing Sims or chasing around her toddler IRL, Sarah is usually baking. There are also rumors she might be a Vampire because she is frequently awake at 2 am and requires SPF 100+ for any outdoor activities.

PAUL BENTLEY

Paul is a writer and gamer from New Jersey, although he spends a lot of his time in Selvadorada in The Sims. He is an outgoing person with an aspiration to learn as much as he can. Let's just hope that his curiosity of Cowplants doesn't get in the way of his goals!

INES

My name is Ines and I love spending my days playing the Sims. I am a legacy player and hopeless builder but I occasionally try it anyway. I had so much fun designing this guide for you. Hope you enjoy and find it helpful with your gameplay!

SCARLET

I'm a wife and mother. I've been playing The Sims series since 2000. I fell in love with it and have been playing ever since. I started modding in Sims 2 and continued to do so for Sims 3 and Sims 4. When I'm not gaming I enjoy photography, cooking, and swimming.

The Sims 4 Island Living adds some new random events available to Sims living in Sulani.

When a household moves to Sulani, they will be greeted by the friendly locals of the neighborhood with a special **Island Welcome Wagon**. The neighbors will welcome you with Kava, a special, relaxing drink that is a staple of the culture.

Sulani locals might visit Sims at their home from time to time, and might even bring over some plates of extra food they had made during the Extra Food Event.

Other events that occur are exclusive to Ohan'ali Town, where Sims can join in on local festivities and events. The following events will spawn in Ohan'ali:

- **Beach Bonfire** — Sims will party around the bonfire.
- **Family Fun Day** — Sims and their families will spend some time at the beach, doing activities such as swimming in the ocean, swinging on the swing set, and playing in the sand.
- **Fishing Competition** — Sims are able to fish with each other at the designated fishing spot, and are able to have the fish they caught prepared for a meal at the food stall.

NEW GAMEPLAY

ELEMENTALS

Elementals are ghosts native to Sulani that can be found on the island. Elementals are protective of the land they inhabited when they were alive, so they like to see the Sulani culture and geography thrive.

Sims with the Child of the Islands trait have the ability to Summon Island Elements in Sulani, which will trigger an event called “Commuting with Sulani Elementals.” This will make a few Elementals appear for the Sim to interact with. However, this event only lasts a few hours, and once it is over, the Elementals will disappear.

Those who have the Child of the Island trait may also “Ask For Judgment” to see if the Elementals approve of how they honor the island’s traditions. If a Sim follows the island’s customs and helps conserve the environment, they are likely to please the Elementals with their special connection to Sulani.

Elementals and offspring to Elementals have the inherited Sulani Mana trait. This trait allows them to use their elemental energy to increase the quality of plants and summon Volcanic Bombs.

ISLAND SPIRITS

Lots with the Island Spirits lot trait, such as the Hoapili residence in Ohan'ali Town, frequently experience visits from clusters of light known as Spirits.

Sims can “Commune” with Spirits, which may give them a positive moodlet that can last up to two days. These moodlets include the +1 “Island Energy” Energized moodlet and the +1 Confident “Island Luck” moodlet. Once the moodlet is applied, the affected Sim will have an occasional blue energy appear around them until the moodlet wears off.

- If a Sim does not want to receive a mood boost, they can simply use the “Release Spirits” or “Banish Spirits” interaction.

DEATH BY DROWNING

The Sims 4 Island Living has added a new way for Sims to die by Drowning. Sims who swim in the ocean with low motives have a high chance of drowning. The grim reaper will then come to take away the Sim's soul and leave their urn floating on lifebuoy.

- Drowning can occur in any part of the ocean just like it can in swimming pools. Sims who are uncomfortable with very low motives should get out of the ocean as soon as possible to avoid drowning.

DEATH BY FIRE

The Sims 4 Island Living has added a new way for Sims to die by Fire. Sims who use the “Try to Touch” interaction on Volcanic Bombs run the chance of burning to death.

The new diver career has only one shift choice: 5pm-8pm. Sims have to use one of the deep water bouys to purchase **Diving Gear** to receive a promotion in this career. As of the time of writing this guide this is a little glitchy, so wait until it directs you to buy the items. Looking to earn a little extra income? Pick up your phone (or log on to your computer) and put your skills to work with all new Odd Jobs. And like any good gig economy, your job performance is rated out of 5 stars. Having a higher rating will grant access to better paying odd jobs. You can find your current Star Rating at the top of the Odd Jobs board.

Having a higher Odd Jobs rating will grant access to higher paying gigs. Two Sims with different ratings may see different jobs when they check the Odd Jobs Board. Odd Jobs are available from 8am-8pm and reset daily. Any of the Odd Jobs a Sim selects or completes during the day will not be accessible to other Sims.

There are two main types of odd jobs, based on when the job begins. The first type are listed as "Begins ASAP" and the important thing to note is the recommended skill (found at the bottom of each listing). Once selected, a Sim will just disappear for a few hours as they head out to do the odd job. It's important to make sure Sims meet the minimum recommended skill.

The next type of odd jobs are listed as “Needed By” and the important thing to pay attention to is the job description. These listings are usually in search of a specific item like a coconut. Once an item is acquired, use the mailbox to send it to the client and complete the odd job. These listings often give a couple days to complete the request, but Sims can only have one active odd job at a time. So until they fulfill the request or cancel the odd job, they will not be able to work any additional odd jobs.

To select an odd job, click on the listing you want then click the check mark button in the bottom right. The Odd Job details will then appear in your Sim’s career panel.

If Sims select a “Needed By” job, task details are at the bottom of the Odd Job detail panel. Once Sims complete all the listed tasks, they will get a notification of their performance and be paid for the work.

To cancel an Odd Job, click on the trash can icon in the Odd Jobs panel.

Once an odd job is completed, Sims will receive one of the following feedback reviews: **Great Success**, **Success**, **Failure** or **Critical Failure**. They’ll be notified of their pay, any tips received, and whether or not their Odd Job ranking went up or down. From there, choose a new odd job, or go about your day.

- This is a work from home career. You will receive a text alert an hour before your shift begins with an option to send your Sim to work or work from home. As with most work from home careers, you typically can advance your career faster by choosing to send your Sim to work. You will also get paid at the end of your shift based on your hourly rate.
- Choosing to work from home does give you more flexibility with your day. You'll be given daily tasks to complete and you will be paid at the start of your next shift. Pay is based upon your job performance so if you fail to complete your daily tasks you may not receive a paycheck.

You'll kick off your new career with the work from home assignment to "Research Conservation" from the computer. This is also a good way to level up your Sim's logic skill, a requirement for promotion. Once your Sim reaches level 4 Logic, they'll also be able to write a Conservation Article to improve their logic skill.

Collecting Research Data is another way to improve your job performance. When you choose to "Survey" a plant, mineral or other item, you'll have a chance to collect Research Data. Sometimes your Sim won't discover anything when surveying an item (and there is a cool down period before you can perform this interaction again) but this is the easiest way to collect Research Data.

CONSERVATIONIST CAREER

The next way is to choose to “Collect Sample” or “Collect Sample from the Ocean”. The sample will appear in your inventory, where you can choose to “Analyze Sample.” You will have more success converting samples to Research Data if you have a higher logic skill. Otherwise the sample will explode in your Sim’s face. Once you’ve collected the Research Data in your inventory, you can choose to “Sell to National Nature Channel” for a small profit or “Send to research Center” for a career boost.

Additionally, the Conservationist Career unlocks more environment interactions (“Take Photo”, “Spray Invasive Species”) and Sim interactions (“Enthuse about Conservation”, “Spread Conservation Awareness”).

The Conservationist Career has two available career branches once your Sim reaches career level 7, the Marine Biologist or the Environmental Manager. The first branch, **Marine Biologist**, is the more passive option. Your Sim will be able to “Survey Wildlife” from a shallow water Snorkeling buoy or “Survey Ocean Floor” from the deep water Diving buoy. They require leveling up their Logic and Fitness skills to promote through this branch. Sending them to Survey Wildlife/Ocean are great ways to improve their fitness skill.

Once your Sim reaches Level 9 they will be able to shoot a [Nature Documentary](#) (also available for Environmental Manager branch). You can choose this action by clicking on your Sim and selecting “Shoot Nature Documentary (\$500)”. Your Sim will disappear for a few hours then return with the film in their inventory. You will have an opportunity to name your video when a Sim first returns, and the video can be renamed in the inventory.

If you own [The Sims 4 Get Famous Expansion](#), you can drag the video to the video station and edit it for a chance to improve the video quality. If you do this you’ll then want to drag the video from the video station to your personal inventory before you can “License to National Nature Channel.” This allows Sims to receive royalty payments.

In comparison to the Marine Biologist branch, there is a lot more you can do with the **Environmental Manager** branch. Your Sim can use the computer to write a Conservation Paper (level 8) for a boost to their logic skill and to earn a tidy sum of simoleons. The Environmental Manager can also work on applying for a Grant, which will award Sims a nice amount of money to help fund their work.

To apply for a grant, your Sim will first need to use a computer to "Prepare Grant Application." You'll find these applications stored in your Sim's inventory. When you are ready to submit an application, select "Submit Grant Application." If your application is accepted you will receive the grant payment immediately. (Rejected applications yield a temporary embarrassed moodlet.)

ENVIRONMENTAL MANAGER

The chances of your grant being approved will depend on the quality of your application. You can also choose to “Incorporate Research Data” you have collected to increase your application’s chance at being accepted. Once you have reaching level 10 of the Marine Biology branch, your Sim will receive the new **Natural Speaker** trait.

GLOBAL POLICIES

The aspect of the Environmental Manager that makes this branch stand apart is the ability to affect changes that impact Sulani and the worlds beyond. Using their phone, Sims can consult on Global Policies. Once you have selected a global policy you will need to consult several times before the policy is enacted. There is a cool down period between when you will be able to consult on a global policy (roughly 12hrs) but you can “Check Progress on Global Policy” at any time. Once you have consulted several times and the progress reaches 100%, your new Global Policy will be enacted.

You can only consult on one policy at a time, but you can continue to enact as many new Global Policies as you would like. If at any time you decide you don’t like a policy, you can grab your phone and “Repeal Global Policy.” The repeal will be effective immediately.

CREATE-A-MERMAID

The Sims 4 Island Living adds the new “Mermaid” life state. Aside from being able to find Mermaids throughout the game, and turning into one as you play, players can also use the new “Create-a-Mermaid” feature in CAS to make a Mermaid family immediately.

- Only Sims aged Teen-Elder can become Mermaids.

Just like human Sims, Mermaids can be created and customized from head-to-fin. However, because Mermaids are a special life state, they do lack some features like shoes and pants (the fin replaces those), but have additional features like Fin and Pupil Customization.

Mermaids can be customized using Hairstyles, Clothing, and Accessories available within the game, but MerSims also have their very own default “Mermaid Form”. This allows for customization of the “Mermaid look” when performing Mermadic actions within the game.

Both “sides” of a Mermaid can look the same by using the “Copy Mermaid Form to Sim” and “Link/Unlink Sim Form with Mermaid Form” options to carry over their looks.

- The Mermaid Form is not optional, so you will not be able to have Mermaids walk around with a fin when they’re not in water, nor will you be able to have them swim in the water without a fin. With the exception of the lower half of their body (shoes, pants, fin, etc), the Mermaid Form can be customized separately from the Sim form.

Mermaids can be created directly from Create-a-Sim, but a human Sim can become one if they desire by consuming the special **Mermadic Kelp**. Mermadic Kelp can be obtained in a number of ways. The easiest way of obtaining it is by purchasing it in the Rewards Store for 500 Satisfaction Points. Mermadic Kelp will appear in the Sim's inventory.

- Mermadic Kelp can also be found through other means like fishing, diving for treasure, requesting a dolphin retrieve treasure, and exploring the cave in Mua Pel'am.

Once a Sim has acquired Mermadic Kelp, they will need to consume it in order to turn into a Mermaid. After eating Mermadic Kelp, Sims will receive the 24-hour +3 Energized “Strange Sensations” moodlet. Once the moodlet is activated, the Sim will need to enter the ocean and officially transform into a Mermaid. If they don't enter the ocean within the 24 hour moodlet span, the Sim will remain human.

MERMAID HYDRATION

Once you have a Mermaid in the family, you'll need to care for their needs. In lieu of a hygiene need, Mermaids have the **Hydration Need**. Showering, bathing, swimming, and drinking water can all fulfill this need and keep Mermaids happy.

Mermaids with low hydration will receive a +2 Uncomfortable “Dried Scales” moodlet, and once the hydration bar is nearly depleted, the Mermaid will receive the +3 Uncomfortable “Dehydrated!” moodlet and start to smell. Hydration is very important for Mermaids.

MERMAID POWERS AND ABILITIES

Mermaids are able to do more in the ocean than human Sims. They can sleep on the water, interact with sea life, dive in deep water without scuba diving gear, call other Mermaids by blowing into a conch shell, and swim really fast. Mermaids are limited in some aspects, though. For instance, they cannot snorkel at buoys, and they get sad when they eat a fish or view a mounted fish on the wall. What Mermaid would want to eat their friends?!

Special abilities aside, Mermaids also depend on Hydration to fuel their special powers and interactions. Using hydration points, Mermaids can affect the mood of other Sims, change the weather, and interact with special Dolphins.

The following powers and interactions are available through Mermaids:

- **Mermaid's Kiss** (-30 Hydration Points) - This will give the receiving Sim a +1 Happy "Aquatic Breath" moodlet.
- **Aquatic Lure** (-30 Hydration Points) - This action can be performed at fishing spots to increase the quality of fish.
- **Summon Ocean Threat** (-30 Hydration Points) - This will cause a dark cloud to form under a Sim while they are in the ocean, which will pull them down under the water. This will give the receiving Sim a +3 Uncomfortable "Deep Sea Entity" moodlet, and might even cause them to drown to death.

MERMAID POWERS AND ABILITIES

- **Siren's Lullaby...**

- **Aegean's Question** (-30 Hydration Points) - This will give the receiving Sim a +2 Tense moodlet.
- **Charmer's Lullaby** (-30 Hydration Points) - This will give the receiving Sim a +2 Flirty moodlet.
- **Inspiring Berceuse** (-30 Hydration Points) - This will give the receiving Sim a +2 Inspiring moodlet.
- **Night's Requiem** (-30 Hydration Points) - This will give the receiving Sim a +2 Sad moodlet.

With the Seasons expansion pack, Mermaid Sims can also affect the weather.

- **Call Clear Skies** (-75 Hydration Points)
- **Call Rainstorm** (-75 Hydration Points)
- **Call Thunderstorm** (-75 Hydration Points)

Mermaids also have additional abilities while in the ocean.

- **Sunbathe**
- **Sleep**
- **Call Over Azure Dolphin** (-30 Hydration Points)

Lastly, Mermaids tend to befriend dolphins easier than other Sims. Once they get to know a dolphin better, they might become soulmates.

SUNBATHING

There is nothing more relaxing than the warm rays of the sun on your skin. Now Sims can click on a lounge chair, pool float, or beach towel and choose to sunbathe. There are three options for sunbathing: “Sunbathe in Current Outfit”, “Sunbathe in Swimwear” or “Sunbathe in Nude.” Mermaids also have a fourth option to “Sunbathe in Open Water.”

- Island Living introduces realistic suntan lines. This means if Sims sunbathe, they should choose their outfit carefully as tan lines will appear in the shape of their clothing.

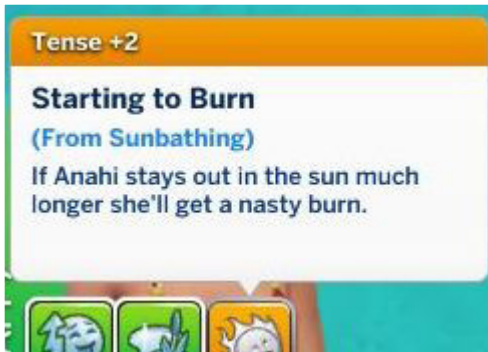

There are a few exceptions to keep in mind when it comes to sunbathing. Sims won't be able to sunbathe nude if there are any children around, and Child Sims can not sunbathe at all.

Sims also won't be able to sunbathe if the sun is not out. (This also applies to cloudy days or during bad weather if you have [The Sims 4 Seasons Expansion](#) installed.) Lastly, there are certain skin types - *particularly the more unnatural shades of blue, green and grey* - that will not tan or burn.

SUNBATHING

Mermaids may be able to sunbathe in one form but not the other based on their skin tone. Other Occult Sims like Vampires and Aliens, will not be able to sunbathe in either of their forms as they will receive a notification that states “This Sim’s skin is incapable of tanning. It must have some weird properties.”

It's important for Sims to keep an eye on how long they are sunbathing, or the sun might turn from friend to foe. One way to prevent burning is to keep an eye on Sims. When a red aura appears with a tense “Starting to Burn” moodlet, cancel the sunbathing action. Failure to cancel the sunbathing action results in the

results in the uncomfortable “Burning” moodlet, which means it is too late for the Sim to stop the sunburn.

Sims can help prevent burns by choosing the “Apply Sunburn Protection” self-interaction. This will protect Sims for 12 hours, and instead of burning, Sims will stop sunbathing once they’ve achieve that perfect sun-kissed look. Perfect tans are not always perfect with pranksters around though...

Sims can also use the “Prank Sunbather” interaction to ruin a tan. This will apply an uneven layer of sunblock to the sunbathing Sim, which will create random silly tan lines once a Sim tans or burns while sunbathing. If that Sim stops sunbathing before having time to tan or burn, then the prank will have no effect. Likewise, if the sunbathing Sim applies Sunburn Protection after being pranked, it will cancel the effects of the prank. While Child Sims cannot sunbathe, they can Prank Sunbathers. Only Sims sunbathing on land (such as a towel or lounge chair) can be pranked. Sims sunbathing on a float are safe from pranksters.

DIVING

Sulani's waters offer even more adventure for those eager to explore the coral reefs and ocean depths. There are two types of buoys, the shallow water buoys and the deep water buoys. The deep water buoys are red on top and allow Sims to free dive. Shallow water buoys are green on top, found near coral reefs and allow Sims to Snorkel.

Sims will need to reach Fitness Skill level 3 to unlock diving interactions, but Mermaids do not need to meet this requirement. Sims will not need a specific Fitness Skill to Scuba Dive, but they should be careful about swimming in the deep waters as they can drown.

- Child Sims are not able to dive.
- Pregnant Sims will not be able to preform any diving during their third trimester.

To unlock more diving options Sims will need to buy Dive Gear by clicking on the deep ocean buoy. Dive Gear isn't a physical item in your Sim's inventory, so once purchased, they can not be lost or traded.

DIVING

The following diving items can be purchased at the deep water buoy:

- **Diving Knife (\$250)** - Allows Sims to dive and collect Seashells.
- **Spearfishing Gun (\$500)** - Allows Sims to Spearfish.
- **Rebreather (\$750)** - This item unlocks Scuba Diving for Sims. Unlike Free Diving, there is not a Fitness Skill requirement for Scuba Diving. Once a Rebreather is purchased, Sims can Scuba Dive immediately. Mermaid Sims do not have the option to Scuba Dive since they already have the ability to Free Dive.
- **Underwater Camera (\$1,000)** - This is used to collect 10 unique photographs for your home. Sims can only use the Underwater Camera if they own the Rebreather (or are a Mermaid). The Underwater Photo Collection is not considered an official collectible so you can't track your progress in the Household Collections menu.
- **Treasure Tool (\$1,200)** - This is the most expensive item, but allows Sims to search the ocean floor for valuable buried treasures. This is the fastest way to complete the new Buried Treasure Collection and can be used with or without the Rebreather. Once Sims own the Treasure Tool, they can choose to Free Dive or Scuba Dive for treasure.

DOLPHINS

Dolphins can be found living in the waters of Sulani, and with the right conditions set, can be interacted with around buoys throughout the world. There's a chance that a Sim might randomly find that a dolphin approaches them while swimming around a buoy, but if the dolphin is not a fan of the Sim, it will swim away. If a Sim is approached, they will be given a chance to learn more about this gorgeous sea creature.

When looking for a dolphin, it's best to look out for the aquatic activity surrounding buoys. Sometimes dolphins will swim in groups, and when they do, there is typically a school of fish that will swim near the surface of the water. Clicking that swirling pool of fish will give the prompt to "Call Over Dolphin" that allows Sims to interact with a dolphin. Sims will need to be quick with their interactions as dolphins don't stick around for long.

Sims can build up their relationship with dolphins by performing different social interactions, some of which are unlocked as the friendship develops. Once friends with a dolphin, a Sim can specifically call for them at buoys.

Albino Dolphins are a rare species that can only be found in Sulani once it has reached its most thriving state of conservation. Finally, Mermaids are able to call over the special Azure Dolphin while in the ocean. Azure dolphins have a blue tint to their pigment, and because of their oceanic connection, mermaids are likely to become Soulmates with these dolphins. Mermaids are also likely to develop a relationship with all dolphins quickly, making it easier to interact with them.

CONSERVATION

The island of Mua Pel'am sits at the foot of an active volcano. The island's majestic waterfall and secret cave have made this a destination spot for locals and visitors to Sulani. However, Mua Pel'am has suffered at the hands of those who do not respect the environment and the ecosystem has suffered. Can you help restore the island so the native species can once again thrive?

There are few things you can do to help Mua Pel'am back to its former glory. The most obvious is cleaning up the debris piles around the island. Additionally, your Sim can attempt to catch invasive species (like goldfish) while fishing and taking care to release any threatened species they catch.

As your Sim makes positive conservation efforts you'll see a heart shaped leaf appear. The more conservation efforts your Sims make, the faster you'll see progress on the Island. Your first indicator of progress will be a popup letting you know the island is improving. Trees will start to appear greener and you'll notice more wildlife around the island.

Unfortunately with progress, you'll see more pests around Mua Pel'am. These can range from Fish Poachers to anti-environmentalists. You'll be able to spot the visual indicator that these Sims are bad actors by the red exclamation mark above their head. You can confront these Sims about their wrong doings (which will be better received if you have a higher charisma) or ask them to leave.
