## Price & Volume Distribution Charts (as at Yesterday)

Technical Analysis

**DEFINITION:** Shariah compliant stocks with Technical Analysis showing 5-days & 10-days Moving Average Price below Yesterday's Close over past 3 days and with Volume Spike.

**CHART GUIDE:** Volume Distribution Chart is a statistical interpretation of the current sentiment on each stock in graphical format. The highest bar categorized as >150k is likely to be traded by institutions or super dealers, while the lowest bar categorized as <15k usually represents retail investors. "Buy Up" refers to more buyers snatching up the lots queued at selling price. "Sell Down" refers to sellers selling their shares to the buying queue

ShareInvestor WebPro > Screener > Market Screener (FA & TA) > select BURSA > add criteria

# kenanga

Kenanga Futures Sdn Bhd (Kenanga Futures) is an award-winning Malaysia listed derivatives broker with over 20 years of expertise in the Malaysian listed derivatives industry. With the vast experience in providing services to top tier financial institutions and corporations across Asia, Europe and the United States of America, Kenanga Futures uses electronic and voice execution and clearing services for products listed on exchanges such as Bursa Malaysia Derivatives Berhad and CME Group. Kenanga Futures also has an extensive network of branches nationwide licensed to trade listed derivatives.

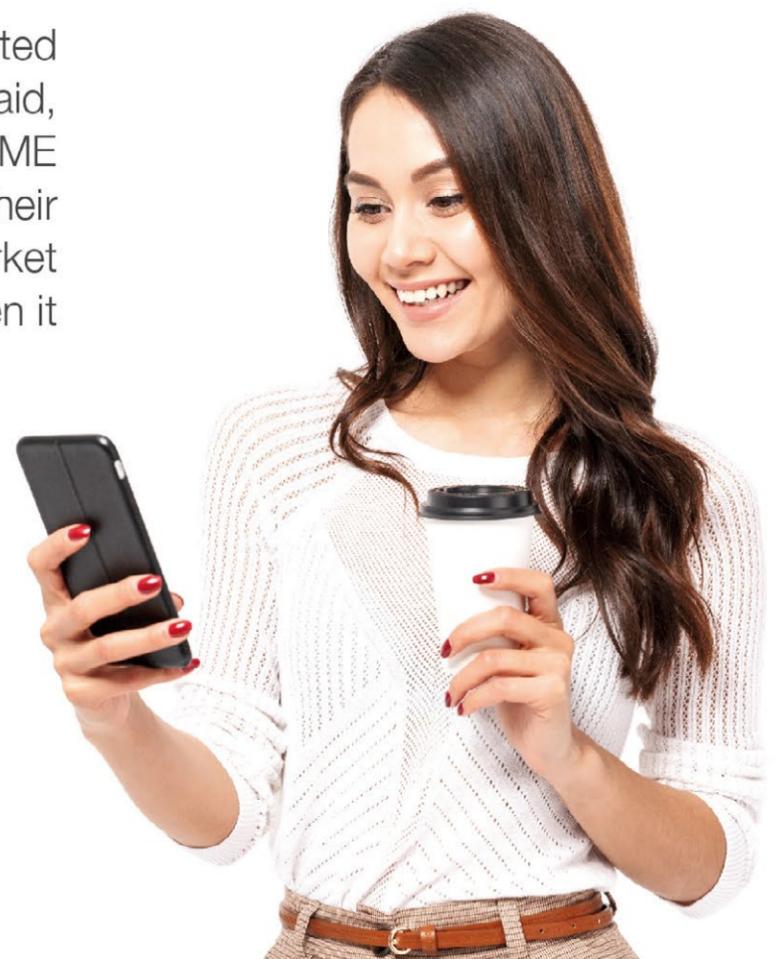

## 8 GOLDEN OPPORTUNITY

Kenanga Futures recently launched a nationwide campaign “Eight Eight Cashback Festival” to reward new and existing clients with a cashback reward of up to 28% for those who trade CME Group (“CME”) micro products from now till 31 October 2022.

Clients who trade into any of the seven CME Group products under this campaign, namely, Micro E-mini S&P 500 Index Futures, Micro E-mini Nasdaq-100 Index Futures, Micro E-mini Dow Jones Industrial Average Index Futures, Micro E-mini Russell 2000 Index Futures, Micro WTI Crude Oil Futures, Micro Silver Futures and E-micro Gold Futures will earn up to 28% cashback.

The CME Micro E-mini products provide clients access to the four leading U.S. stock indexes – S&P 500, Nasdaq 100, Dow Jones Industrial Average, and Russell 2000. These Micro e-mini contracts are only a tenth of the size of a standard contract. Hence, allowing clients to trade these smaller-size futures contracts enables them to manage their risks and portfolio appropriately as market conditions change.

Chief Executive Officer/Executive Director and Head of Listed Derivatives of Kenanga Futures Sdn Bhd, Azila Abdul Aziz said, “With accessibility to additional seven (7) products under the CME Group, we believe this campaign will help clients diversify their portfolios as they look to navigate risks in the uncertain market conditions. Clients value efficient and convenient solutions when it comes to trading and managing risks.”

Russell Beattie, Managing Director and Head of Asia Pacific, CME Group said, “Volatile and uncertain market conditions have created a heightened need for risk management globally, and we are committed to helping traders of all sizes manage portfolio risk. Our smaller-size contracts allow active traders to more nimbly execute their trading strategies and hedge their portfolio positions, using our liquid and time-tested markets, around the clock and around the world.”

This Campaign is one of the many initiatives that Kenanga Futures has created to raise awareness and educate active investors about the opportunities available in the listed derivatives market. This is in line with our continuous commitment to further engage and educate new and existing clients and enabling them to adopt futures contracts as a tool to hedge and leverage their varied investment exposures.

Clients can access both U.S. and Malaysian listed derivatives on a single trading platform via the company’s trademarked real-time customised online trading solution, KDF TradeActive™, available on both desktop and mobile devices, giving clients easy access to real-time market data and flexibility to trade on-the-go.

For more information on Kenanga Futures and the “Eight Eight Cashback Festival” campaign, please visit <http://www.kenangafutures.com.my>.

**Disclaimer:**

Listed derivatives products are based on highly leveraged margin trading. These contracts carry a very high degree of risk and trading such instruments may expose investors to substantial losses as well as gains. The price of the products offered may fluctuate higher or lower, and under circumstances an investor may sustain total loss of their investment. As investor should make an appraisal of the risks involved in investing these products and should consult their own legal, financial, tax, accounting and other professional advisors, to ensure that any decision made is suitable with regards to the investor’s circumstances and financial positions. This document has been prepared solely for marketing purposes and for the use of the recipient.

## Price & Volume Distribution Charts (as at Yesterday)

Technical Analysis

**DEFINITION:** Shariah compliant stocks with Technical Analysis showing Bullish Momentum and Price Uptrend. The share price closed at the highest price yesterday. The typical price was higher than the previous day's typical price.

**CHART GUIDE:** Volume Distribution Chart is a statistical interpretation of the current sentiment on each stock in graphical format. The highest bar categorized as >150k is likely to be traded by institutions or super dealers, while the lowest bar categorized as <15k usually represents retail investors. "Buy Up" refers to more buyers snatching up the lots queued at selling price. "Sell Down" refers to sellers selling their shares to the buying queue.

# Robust GDP seen to sustain in 3Q - Growth of between 8% and 9% estimated – SERC

**A**ccording to Socio-Economic Research Centre (SERC) executive director Lee Heng Guie, Malaysia is estimated to experience a robust gross domestic product (GDP) growth of between 8% and 9% in the third quarter of this year (3Q22), partly owing to the low base of 3Q21 where GDP contracted by 4.5% year-on-year (y-o-y). This would be similar to the GDP growth recorded in the previous quarter (2Q22). Speaking at a media briefing on Malaysia's quarterly economy tracker, he said that for 3Q22, buying sentiment is quite positive up till now.

In 2Q22, Malaysia recorded an extraordinary GDP growth of 8.9% y-o-y, beating market expectations and bringing GDP growth in the first half of the year (1H22) to 6.9% y-o-y. However GDP growth is expected to ease to the range of 4% to 5% y-o-y going into 4Q22 on account of slowing global growth prospects. With that, SERC has revised its full-year GDP growth projection for Malaysia to 6.5% from an initial 5.2%.

For 2023, the GDP is forecast to grow at a more moderate pace of 4.1% owing to weakening global growth, the normalisation of domestic demand

and also the high-base effect. Domestic demand will be impacted by higher inflation and cost of living, as well as interest rates, while private investment remains cautious due to increased costs, shortage of workers, external uncertainties and domestic political uncertainty.

On the global economic outlook, he foresees an increasing risk of a slowdown next year pointing out that the International Monetary Fund had said a global recession in 2023 cannot be ruled out and the World Bank said global rate hikes could trigger a recession in 2023. In the United States, over two-thirds of economists believe a recession is likely to hit in 2023.

Commenting on inflation, it is too early to say if price pressures have peaked owing to the mixed inflation data by major advanced economies. While headline inflation in the United States indicated a reversal of the surge, core inflation accelerated. In Europe, inflation surged higher. However he agrees with Bank Negara's projection of inflation peaking in 3Q22.

Interest rates are expected to remain at 2.5% this year, following a cumulative 75-basis-point (bps) hike throughout the year so far. But the central bank is expected to raise the interest rate by another 50 bps in 1H23 to 3%. However he believes that Bank Negara will take into consideration the impact of its gradual and measured pace of interest rate hiking trajectory due to growth risks while anchoring inflation under its radar.

The pressure on the Ringgit would remain in the near term as there was no sign of US interest rates peaking. Once interest rate in the United States stabilises, pressure on emerging markets' currencies will reduce, including the Ringgit. Commenting on Budget 2023, he hopes it will contain more development and structural reforms rather than be election-centric. As the economy has moved out of contraction, it no longer requires extraordinary massive deficit fiscal spending packages as during the Covid-19 pandemic. SERC estimates a deficit budget of between 4.5% and 5.5% of GDP in 2023 compared to an estimated average deficit of 6.2% in 2020 to 2022. He also recommended the reintroduction of the goods and services tax (GST) starting with a 4% rate.

## **MAYBANK IB ISSUES STRUCTURED WARRANTS OVER HONG KONG STOCKS - FIRST EVER STRUCTURED WARRANTS OVER NETEASE INC ON BURSA MALAYSIA**

According to Azzahir Azhar, Head of Investment Management at Maybank Investment Bank, Maybank IB has begun issuing structured warrants over companies listed on the Hong Kong Stock Exchange (HKEX). The maiden launch of 16 structured warrants comprises an even combination of call warrants and put warrants over 8 different HKEX-listed stocks. This includes the first ever structured warrants on Bursa Malaysia over NetEase Inc, China's second largest online game company by revenue. Other global brands in the maiden launch today are from the automotive and e-commerce sectors, such as Alibaba Group Holding Ltd, JD.com Inc, Geely Automobile Holdings Ltd, Tencent Holdings Ltd, Ganfeng Lithium Co Ltd, Meituan and BYD Company Ltd.

As these warrants are listed on Bursa Malaysia and settled in Ringgit, investors will be able to gain exposure to Hong Kong-listed companies without the need for a foreign trading account or currency conversion. The warrants enable investors to exercise their investment strategies on the underlying stocks with a much lower capital outlay while taking advantage of the leverage effect.

As a leading equity-linked structured products issuer in Malaysia, Maybank Investment Bank continues to innovate to satisfy market demand for more sophisticated products to aid in portfolio diversification. This launch of warrants over HKEX-listed stocks caters to investors seeking diversified investment instruments and geographical exposure while having the convenience of settling their trades in the local currency. Call warrants enable investors to profit from price appreciation of the underlying shares. Put warrants are the opposite whereby they are used to hedge against negative price performance of the underlying shares. The advantage of this call-put issuance is that investors will be able to express their views in either direction.

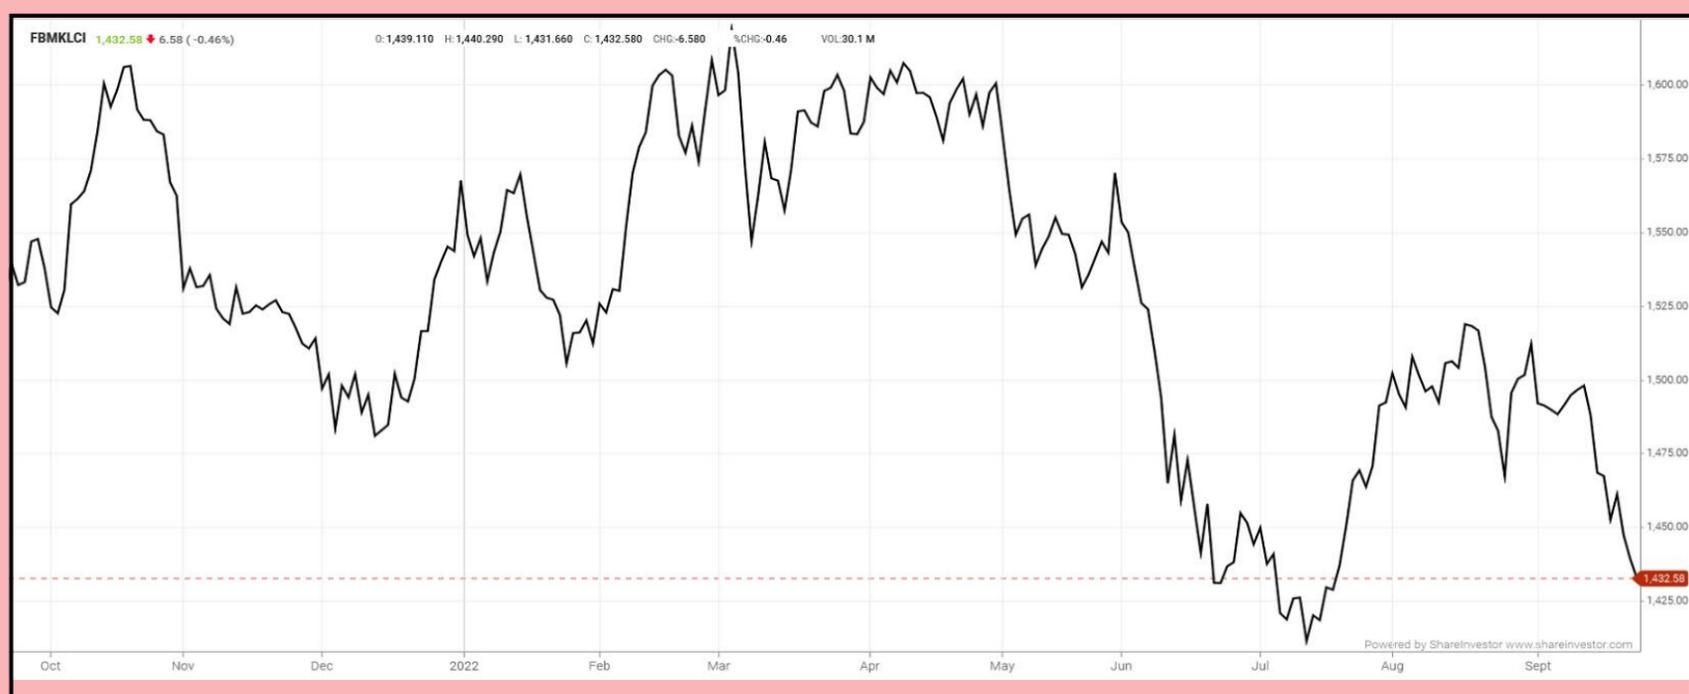

Investors who are new to structured warrants are advised to understand and evaluate the risks involved and seek professional advice in order to make informed investment decisions. In conjunction with this launch, Maybank IB will be conducting a webinar on structured warrants investing on Wednesday, 21 September 2022 at 8:00pm. To learn more, visit [www.warrants.maybank2u.com.my](http://www.warrants.maybank2u.com.my) and join Maybank IB's Telegram channel, "Trade With Maybank".
