AMANAHRAYA LAUNCHES SHARIAH INCOME FUND WITH RM500M TARGET FOR 2023

AmanahRaya Investment Management Sdn Bhd (ARIM) launched its AmanahRaya Syariah Income Fund (ARSIF), with RM500 million as the target fund size at the end of this year. According to ARIM managing director Mohamad Shafik Badaruddin, the target is high, but reasonable. He said that corporate investors were interested in the ARSIF fund due to its low risk investment, as the returns are higher than fixed deposits and not locked. The investors get to enter and exit freely. The fund is suitable to invest in short-term fixed income which is very liquid.

The group which is a wholly owned subsidiary of AmanahRaya Bhd and a licensed asset management company under Capital Market and Services Act had initially launched the fund on May 5, 2022. As of Jan 31, 2023, its fund size has crossed RM200 million.

According to ARIM group managing director Ahmad Feizal Sulaiman Khan, the group has reached another milestone by launching its seventh unit trust fund and that ARSIF invests in short-term to medium-term Islamic bonds with maturities of less than five years. ARSIF targets investors that seek low to medium risk profiles with exposure in sukuk, Islamic negotiable instruments of deposit and Islamic money market instruments. The fund also aims to provide a regular stream of monthly income – either in units or cash – by investing in Islamic money market instruments and sukuk. Its sector allocations were 12% for Islamic cash and money market, while 88% will be provided for sukuk. The Fund's top holdings include Malaysian Resources Corp Bhd, Exsim Capital Resources Bhd, UEM Sunrise Bhd, WCT Holdings Bhd and Al Dzahab Assets Bhd.

MALAYSIA'S ECONOMY TO GROW AT MODERATE PACE THIS YEAR - DOSM

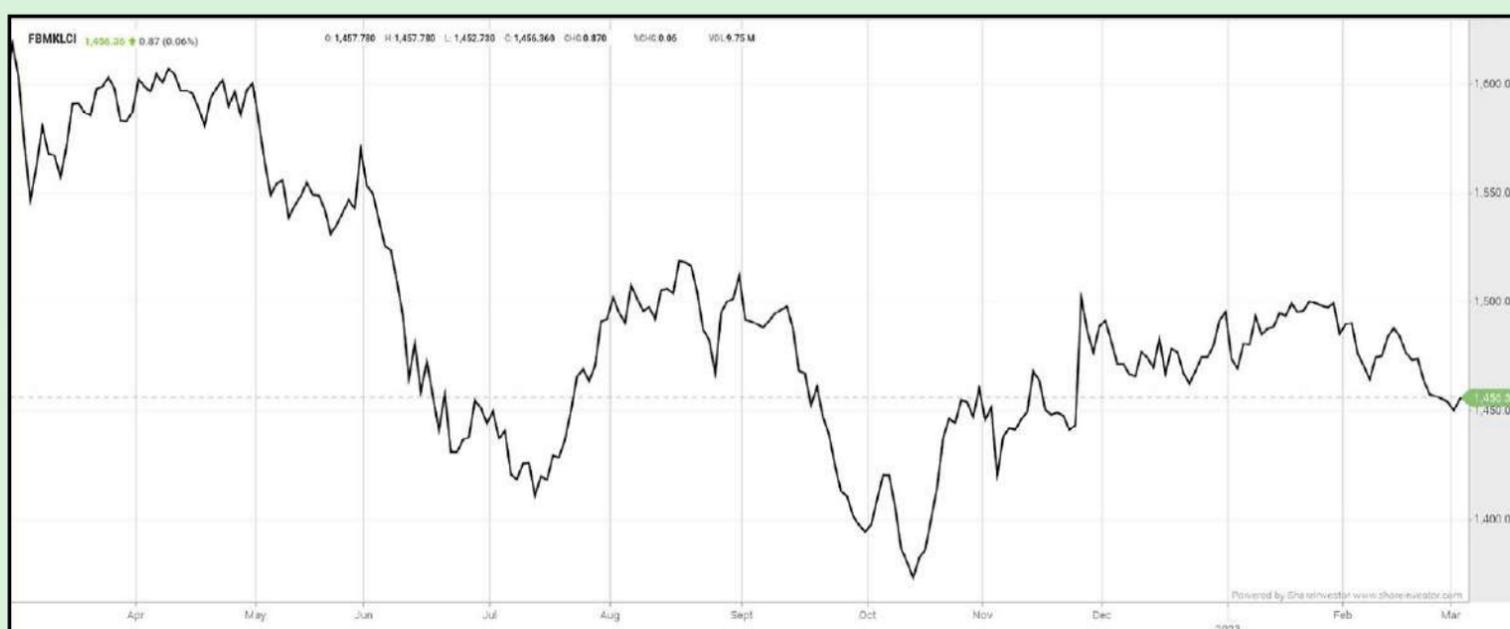

According to Department of Statistics Malaysia (DoSM) chief statistician Datuk Seri Dr Mohd Uzir Mahidin, the Malaysian economy is anticipated to grow at a more moderate pace this year following a strong recovery in 2022 as economies around the world continue to struggle to sustain growth. Malaysia's merchandise trade is predicted to continue growing in 2023, albeit at a slower rate. Based on the Ministry of Finance's report, total trade, exports and imports were projected to increase by 1.3 per cent, 2.2 per cent and 0.2 per cent, respectively. This projection was in line with the World Trade Organisation estimates, which expected global trade to grow marginally by 1.0 per cent in 2023. Following slower external demand and diminished low-base effect, the manufacturing sector is foreseen to enter a moderate phase in 2023.

The ongoing global uncertainty is also expected to influence economic and social activities as well as the labour market. Malaysia's Leading Index decreased by 0.6 per cent, equivalent to 0.7 point, to 110.7 points in December 2022 as compared to 111.4 points in December 2021.

Looking at global economic scenario, continuous worldwide inflation has eroded purchasing power and consumers are taking a cautious stance on spending, hence impacting economic performance. Based on the World Economic Outlook Update released by the International Monetary Fund in January 2023, the world economic growth is projected to moderate to 2.9 per cent in 2023 and improve to 3.1 per cent in 2024. Meanwhile, most economies displayed a slower Gross Domestic Product performance in the fourth quarter of 2022 compared to the third quarter of 2022.

DIVERSIFICATION, PURE PLAY AND CONGLOMERATES

Devanesan
Evanson

**Chief Executive
Officer, Minority

They say that you should never put all your eggs in one basket. And that diversification is the answer to spread your risk. And there is truth in the saying. What is often not emphasized enough is the risk of over-diversification and the perils it brings – the risk of being ‘a jack of all trades but a master of none’. PLCs have a choice. Whether to diversify or remain focused on one business. And even when we talk about diversification, there is diversification in related areas e.g., downstream and upstream operations, and diversification into other unrelated sectors.

VERTICAL INTEGRATION

An example of diversification in related areas is Farm Fresh Berhad’s (FFB) recent foray into the ice cream business. Investment analysts have maintained a positive stance on FFB following the dairy producer’s proposal to acquire a controlling stake in ice-cream company The Inside Scoop Sdn Bhd (TISSB). FFB announced the proposed acquisition of a 65% stake in TISSB, an ice cream maker with 37 retail outlets nationwide, for RM83.9 million via share purchase and subscription. Analysts have been largely optimistic on the acquisition

citing the positive business synergies across its value chain and the potential foray into the consumer-packaged goods (CPG) ice cream market. Having retail ice creameries as a new revenue stream offers various businesses synergies to FFB through product cross-selling opportunities, regional store expansions and wider product distribution network capabilities. The investing fraternity generally views such related forays positively.

HOLDING COMPANY DISCOUNTS

When a PLC diversifies into many sectors, there is what is known as the 'holding company discount'. The share price is discounted because the PLC is invested in many unrelated sectors – 1+1+1 is less than three. That is why the concept of 'unlocking the value' is a popular way to create value for shareholders. This is when the conglomerate lists its other related businesses as separate PLCs – in which case, 1+1+1 may be more than three.

PURE PLAY AND CONGLOMERATE

At one time, the concept of a conglomerate was popular with many investors - the huge ambling lumbering giant of a PLC with fingers across many unrelated sectors. Size mattered then. But with size came the loss of agility and nimbleness. They were not the bamboo that could bend with the strong winds. They were the sturdy erect trees that would break at the onslaught of strong winds. Such conglomerates generally fell out of favour with investors who seemed to prefer pure-play PLCs. Investors who see a bright future for palm oil, prefer to invest in companies whose business focus was palm oil, i.e., oil palm plantation companies. So, the conglomerate with palm oil as one of its businesses was not the preferred choice of the investor who may see a future for palm oil but not for the other unrelated sectors within the conglomerate.

PURE PLAY

An example of the 'holding company discount' and 'unlocking of value' through pure play restructuring was Sime Darby Berhad's (SDB) restructuring plan in 2017 that created three independent pure-play companies which was listed on the Main Market of Bursa Malaysia Securities Berhad (Bursa Securities). The intended corporate structure

aimed to maximise the value for shareholders who will eventually hold shares in three exciting pure plays. The plan involved an internal restructuring and share distribution exercise before listing its plantation and property businesses. With the listing, the three companies, namely, Sime Darby Plantation Berhad, Sime Darby Property Berhad and Sime Darby Bhd, with their focused businesses were well positioned for further growth in their respective sectors globally and regionally. With direct access to capital markets and funding flexibility, each pure-play company benefited from better-focused capital management and customised growth strategies. Meanwhile, shareholders could participate directly in the equity and growth of the three companies with greater visibility on the financial performance of each listed entity. Shareholders could choose which pure-play sector they wanted to be invested in.

MANAGEMENT CAPABILITY

When diversifying, boards must consider whether they and the management have the capability and capacity to execute the diversification successfully. That is the same question a minority shareholder should ask when a PLC announces a diversification. The further away the diversification is from the core business of the company, the greater the risk that things might go wrong.

Conglomerates tend to have big boards at the holding company level as they need expertise in the various sectors in which they are invested in. Thus, the conglomerate which is invested in palm oil, property and heavy machinery will have to have directors with knowledge in these sectors. Big boards have a risk of becoming dysfunctional. There is also a risk that focus would be lost if the board, as a holding company board, covers many different sectors. Conglomerates also tend to have an elaborate 'multi-tiered' reporting hierarchy – a holding company with many subsidiaries with each one being involved in an unrelated sector. The bureaucracy and the multi-tiered reporting structures may be a hindrance rather than a help. The preference now is for flatter reporting structures. So, it is understandable if minority shareholders tend towards pure-play PLCs and if there is any diversification, it is either upstream or downstream. That way, they can invest in sectors that they want to be invested in.

DEFINITION: Insider Activity shows the trades made by substantial shareholders or directors of the company. Purchases by the directors and company share buyback may indicate the share price is undervalued and brings confidence to the price trend of the share price.
